Subject: Microsoft Windows Is In Control

My opinion:

There is no operating system option for personal computers other than Windows. Until they are forced to unbundle all of the applications they include with Windows AND make their applications available on other operating systems will the users have a choice. Currently, if I use other office(spreadsheet, word processor, database etc) applications such as Lotus, Star Office etc, then my information exchange with people / colonies is handicapped if they use Microsoft products. Every new release of Microsoft products changes just enough to make the other competing product incompatible. It doesn't have to be that way but it sure works for Microsoft.

Please help us to protect this very important resource....Please.
